Comments

(Set forth by above question #, if applicable.  
Use "Additional Comments" Sheet, if needed)

File #: 95-271029

#1. It cannot be determined from the documentation if the tests were performed in a scientifically acceptable manner.

#2. The results are not adequately documented in the notes. The notes are not dated, are in pencil and not ink and use abbreviations that are difficult to interpret (such as "M- dk dist, lt dist, lt indist" and "cut-ssp" to describe some of the characteristics of the hair).

The characteristics of the victim's known head hair standard is not adequately described in the notes.

A verification of the hair comparison by a second, qualified hair examiner should have been obtained. The verification practice began in 1986, according to Doug Deedrick.
